The flying car

FIRST AND ONLY | DRIVE + VERTICAL TAKEOFF

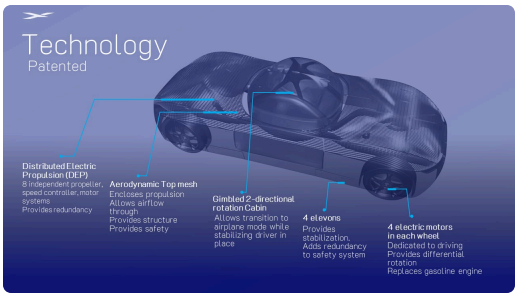

Actual photograph of an Alef flight. Not AI-generated, not a rendering.

- Full-size prototype stage: driven, flown, piloted
- 1,000+ logged flights, 500 drive tests
- 3,600 pre-orders with $150 and $1,500 refundable deposits
- 3,100 individual deposits + 500 B2B agreements (Emergency Response, Resellers)
- Featured on CNN, Fox, NBC, ABC, BBC, Reuters, and Time Magazine Best Innovation
- 2 billion views of Alef videos across all channels on the internet
- Legal today. Plugs into existing ground and air infrastructure today.
- Go-to-market: Ultralight Aircraft (no certification, no license needed) for remote areas or large rural properties, and an Emergency Response SAR vehicle
- Long-term vision: The inevitability of flying cars as the main transport because of increasing traffic
- Further along than all eVTOLs were at the time of their IPO (multiple IPO, SPAC, and acquisition requests received)

The Alef flying car on a residential street.

Patented technology: distributed electric propulsion, aerodynamic top mesh, gimbaled rotating cabin, elevons, in-wheel motors.
