ALEF
FLYING CAR

INVESTOR OVERVIEW
November 2026

The flying car

FIRST AND ONLY | DRIVE + VERTICAL TAKEOFF

PROTOTYPE & TESTING

- Full-size prototype stage: driven, flown, piloted
- **1,000+** logged flights • **500** drive tests

DEMAND

- **3,600** pre-orders with $150 and $1,500 refundable deposits
- **3,100** individual deposits + **500** B2B agreements (Emergency Response, Resellers)

RECOGNITION

- Featured on CNN, Fox, NBC, ABC, BBC, Reuters, and Time Magazine Best Innovation
- **2 billion** views of Alef videos across all channels on the internet

REGULATION & MARKET

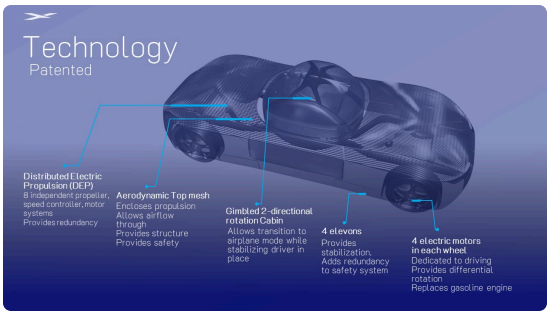

- Legal today. Plugs into existing ground and air infrastructure today.
- **Go-to-market:** Ultralight Aircraft (no certification, no license needed) for remote areas or large rural properties, and an Emergency Response SAR vehicle
- **Long-term vision:** The inevitability of flying cars as the main transport because of increasing traffic

INVESTMENT

- Further along than all eVTOLs were at the time of their IPO (multiple IPO, SPAC, and acquisition requests received)

The Alef flying car on a residential street.

Patented technology: distributed electric propulsion, aerodynamic top mesh, gimbaled rotating cabin, four elevons, four in-wheel motors.
